AGILE, SCRUM

Sr. Front End Web Engineer **Aug 2020 - Aug 2023** Flexcar

- Tech Stack: React.js, Typescript, Redux, ThemeUI, Freemarker, Nunjucks, Java
- Main FE Dev in developing an initiative that branched off Zipcar and eventually launched into its own company
- Created multiple pages and components from the ground up using an atomic based organization that would grow to be the foundation of the code base
- Consumed REST API in order to display user and vehicle information on a webpage
- Developed a customer service application using a Java templating language
- Using Nunjucks, made templates for emails to be sent to customers
- Applied monitoring technology such as Fullstory and Optimizely to better understand customer behavior
- Leveraged Detox to create end-to-end testing for our mobile application written in React Native

Front End Web Developer **Oct 2019 - Aug 2020** Zipcar

- Tech Stack: CSS/SASS, React.js, Typescript, Redux, Jest
- Created React components for the customer facing web application that allowed users to reserve cars
- Advanced a pre-existing library with new components using SASS and React based utility hooks
- Using Javascript, developed bridge methods and APIs for the front-end to communicate with the back-end services made with Java
- Maintained 100% React and Redux code coverage using Jest

Front End Experience **Jun 2017 - Oct 2019** SapientRazorfish

- Tech Stack: HTML, CSS/SASS, React.js, React Native, Redux
- Was part of a team creating a React based web application flow for Sterling Jewelers credit card initiative
- Cooperated with international developers to create a web page for Hyundai Canada that is still in use today
- Worked on an AGILE team using React Native to create a Telematics application for a major insurance company
- Participated in a rapid growth/project creation team centered around virtual reality
